

Voluntary Assisted Dying

After careful consideration by our Board of Directors and Executive Management Team, Bushland Health Group Limited, has decided not to participate in the Voluntary Assisted Dying (VAD) process.

Bushland Health Group Limited, respects and supports Residents' choices in accessing VAD, and therefore a Resident expressly choosing to access VAD will be provided with information, access to relevant medical practitioners and, if necessary, a referral to another facility that does participate in VAD and has staff appropriately trained to support Residents, their families and support networks through the VAD process.
